

## A.W. Mercer New Equipment Announcement

### A.W. Mercer, Inc. Boyertown, PA

A **SPANCO Workstation Bridge Crane** has been installed to enable A.W. Mercer to safely handle the movement of various weldments of all shapes and sizes. This versatile equipment is the second unit that the company has purchased and installed giving it over 1600 square feet of fabrication space under crane. This quality-built **SPANCO Workstation Bridge Crane** provides the flexibility and efficiency needed in a variety of complex workstation applications where multiple areas of lifting are required. This additional crane will safely enable A.W. Mercer to increase productivity.

A **SPANCO Workstation Bridge Crane** easily replaces multiple jibs or forklifts to increase our employees' coverage areas. It allows for employees to safely and ergonomically move product to eliminate unneeded lifting. The **SPANCO Workstation Bridge Crane** empowers single operators to independently move loads from one station to another.
